

February Data Live and New Improved Search

Ourpropety.co.uk has now made the latest update from the Land Registry data, making an increasing number of property sales available for users to search.

The update includes approximately 30,000 new sales in February and an extra 20,000 for January bringing our total sales for England and Wales in 2005 to 75,000.

Scottish updates have also been made, enabling users to now search over 11,000 new Scottish residential, commercial and land sales.

We have also been working hard to optimise our search facility in order to be able to bring back results more quickly and more efficiently. A redesign to the results page has also been made which should make finding that exact road or property much easier to find.
